

JOSE ANTONIO PAREJO TOVAR
Senior Front-end Developer
email: parejojose77@gmail.com
Location: Bogotá, Colombia

RESUME SUMMARY

Results-oriented Senior Software Engineer with over 8 years of experience building high-performance web applications. Expert in the modern JavaScript ecosystem (Angular, Vue, React) with a proven track record of leading migrations, optimizing page load times by up to 20%, and mentoring development teams. adept at bridging the gap between engineering and product requirements to deliver scalable, user-centric solutions.

WORK EXPERIENCE

Senior Software Engineer | EPAM April 2022 – Present

- Architected and developed scalable user-facing features using Angular and TypeScript, achieving a **20% increase in page load speed** and user engagement.
- Implemented rigorous testing strategies (Unit, Integration, and E2E with Cypress), significantly reducing production bugs and ensuring platform stability.
- Optimized CI/CD workflows using Git, ensuring smooth integration of new features and minimizing merge conflicts across distributed teams.
- Championed code quality standards through code reviews, design pattern implementation, and performance refactoring.

Senior Frontend Developer | Zemoga Inc March 2021 – April 2022

- Developed complex features for high-traffic client applications using Vue.js (v2), ensuring seamless API integration and state management.
- Increased application usability by **20%** and reduced software bugs by **40%** through comprehensive refactoring and the introduction of Jest unit tests.
- Led accessibility (a11y) improvements, ensuring compliance with industry standards and broadening the user base.

Frontend Lead | Blacksip October 2019 – March 2021

- Led the Frontend team, collaborating directly with Product Owners to define backlogs, technical roadmaps, and sprint goals.
- Orchestrated a major migration of the core e-commerce platform from **AngularJS to Angular**, modernizing the tech stack and reducing technical debt.
- Implemented Angular Universal (SSR), which significantly improved SEO rankings and initial load performance.
- Generated detailed sprint performance reports to track team velocity and identify areas for process improvement.

Lead Engineer | Monodual October 2017 – October 2019

- Led cross-functional teams (designers, marketers, developers) to successfully launch digital products.
- Analyzed product performance metrics to identify success factors and drive data-backed iterations for future development.
- Streamlined daily operations and development workflows, ensuring projects stayed on schedule and within scope.

Co-Founder & Lead Developer (CEO) | Dipro October 2017 – October 2019

- Defined the strategic vision and business goals while leading the technical development of software applications.
- Designed and engineered digital products using the Adobe Creative Suite and modern web technologies.
- Managed the full business lifecycle, from lead generation and sales to product delivery and client relationship management.

SKILLS

- Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/SASS.
- Frameworks & Libraries: Angular, Vue.js, React, Next.js, Nuxt.js, Node.js, Express.js, NestJs.
- Tools & Platforms: Git, Docker, Jenkins, AWS, Vtex, Magento, Shopify, WordPress.
- Testing & Quality: Cypress, Jest.
- Methodologies: Scrum, Agile, Jira, Bitbucket.

RECENT PROJECTS

Ideias Journal | *Vue.js, Node.js, Firebase*

- Developed a social networking platform for scientists to share research and debate findings. Handled full-stack implementation using Vue.js for the frontend and Firebase for real-time data management.

E-track Analytics | *Vue.js, WordPress*

- Building an analytics dashboard featuring heatmaps, attention maps, and motivation charts. Integrated a Vue.js application with a WordPress commercial front-end.

Nimvu (E-commerce Platform) | *Next.js, MedusaJS, React, Tailwind*

- Currently architecting a headless e-commerce platform for 3D printed home products.
- Implemented a custom storefront using **Next.js** connected to a **MedusaJS** backend, ensuring high performance and SEO optimization.
- Developed custom 3D product configurations and integrated regional payment gateways for the Colombian market.
